

VENKATA SAI KUMAR G

DevOps Engineer

Ph : 9121846068 | venkatasai2036@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

- **4 years** of experience as a **DevOps Engineer** in designing scalable cloud infrastructure and automating software delivery pipelines.
- Strong expertise in **AWS, Kubernetes, Docker, Terraform, Jenkins, Ansible, git, Linux**.
- Experienced in building **highly available** microservices platforms with **Kubernetes**, container orchestration and auto-scaling.
- Hands-on experience implementing **CI/CD pipelines**, monitoring, **centralized logging** and **incident management** practices.
- Skilled in improving **system reliability** using observability tools such as **Prometheus, Grafana, CloudWatch** and **ELK Stack**.
- Automation with **Bash/Shell scripting** and configuration management using **Ansible**

CORE DEVOPS SKILLS

- **AWS Cloud:** IAM, EC2, EBS, EFS, VPC, Route53, S3, CloudFront, RDS, Lambda, ECR, EKS, CloudWatch, ALB
- **Containerization:** Docker, Kubernetes, Helm
- **Infrastructure as Code:** Terraform
- **Configuration Management:** Ansible
- **CI/CD:** Jenkins, GitHub Actions, ArgoCD
- **Monitoring & Observability:** Prometheus, Grafana, ELK Stack , CloudWatch
- **Scripting:** Shell Scripting
- **Version Control:** Git, GitHub
- **Operating Systems:** Linux (Ubuntu)

PROFESSIONAL EXPERIENCE

DevOps Engineer :

Biometric Service Provider | Dec 2022 – Present

- Designed and implemented CI/CD pipelines using **Jenkins** and to automate **build, test** and **deployment** workflows.
- Built and managed **Docker** images for microservices and deployed containerized applications to **Kubernetes** clusters.

- Managed Kubernetes resources including **Deployments, Services, ConfigMaps, Secrets and Ingress controllers**.
- Implemented rolling deployments, **Horizontal Pod Autoscaler (HPA)** and scaling strategies to ensure **high availability**..
- Developed reusable **helm** charts to standardize infrastructure provisioning across environments.
- Created **Ansible playbooks** for automated server provisioning and configuration management.
- Implemented monitoring and alerting using **Prometheus, Grafana** for production environments.
- Configured centralized logging architecture using **ELK Stack** to analyze application logs and troubleshoot incidents.
- Provided on-call production support, performed **root cause analysis (RCA)** and improved system reliability.
- Deployed containerized applications with CI/CD pipelines across **Dev, Staging and Production** environments.

Associate Cloud Engineer :

Cloud-Native Order Management Platform| Mar 2022 To Dec-2022

- Assisted senior DevOps engineers in managing **AWS EKS** environments.
- Supported CI/CD pipeline implementation using **Jenkins** and **GitHub**.
- Built and pushed Docker images to **Amazon ECR**.
- Assisted in Kubernetes deployments and **application releases**.
- Monitored applications and infrastructure using **Prometheus, Grafana**, and **CloudWatch**.
- Helped **troubleshoot** pod failures, deployment issues, and application outages.
- Worked with **Terraform modules** to provision and update AWS resources.
- Supported **IAM, IRSA**, and **KMS** configuration under senior engineer guidance.
- Participated in **production deployments** and operational support activities.
